

The Danube Guides concept and network is an open environmental education approach to strengthen the Danube Region. The project partners and institutions involved do not pursue any direct commercial interests. Their commitment is dedicated to environmental protection, sustainable development and raising awareness among the population.

# DANUBE GUIDES

explore the unique nature, culture  
and history of the Danube region

## WHERE TO FIND US

## WHO WE ARE

Danube Guides are specially trained to present the Danube region as an adventure space to various target groups in an exciting, sustainable and environmentally conscious way. What makes them so unique is their extensive knowledge of the interactions between humans and the environment, sustainable development, ecosystems, social trends and much more. Aside from that, they have the ability to pass on this knowledge through fresh methods and communication channels.

In six countries of the extended Danube region, the Danube Guides offer a variety of individual tours and give insights into the unique nature, culture, and history along the second largest river in Europe.

By means of gentle tourism and using progressive didactic methods, the Danube Guides offers are not only of a touristic nature, they raise awareness of how important environmental protection is and thus, contribute to it in the long run.

*"What a great tour! I got to know the Danube from a completely different perspective. I am quite excited about what awesome surprises the Danube has to offer."*

(Dr. Swantje Volkmann; Cultural Coordinator for the Danube Region)
